

# SUJITHA K

## Computer Science and Engineering Student

9442386472 | sujithakamalakannan@gmail.com | Namakkal, Tamil Nadu, India

### PROFILE

Motivated and detail-oriented Computer Science and Engineering student with a strong interest in software development and emerging technologies. Interested in Cybersecurity, UI/UX Design and Full Stack Development, with a focus on learning through practical projects and real-world applications.

### EDUCATION

|                                                         |                                        |
|---------------------------------------------------------|----------------------------------------|
| <b>B.E. Computer Science and Engineering</b>            | <b>CGPA: 8.53 (up to 4th semester)</b> |
| Kongunadu College of Engineering and Technology, Trichy |                                        |
| <b>Higher Secondary (12th)</b>                          | 2024   85.67%                          |
| Kongunadu Matric Higher Secondary School, Namakkal      |                                        |
| <b>Secondary (10th) – SSLC</b>                          | 2022   88.4%                           |
| Kongunadu Matric Higher Secondary School, Namakkal      |                                        |

### TECHNICAL SKILLS

**Programming:** Java, Python, C  
**Web Technologies:** HTML, CSS  
**Database:** DBMS, SQL  
**Mobile & Cloud:** Flutter, Firebase, Google Nearby Connections API  
**Soft Skills:** Teamwork, Adaptability, Quick Learner  
**Areas of Interest:** Cybersecurity, UI/UX Design, Full Stack Development

### PROJECT

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Disaster Communication Without Internet Using Edge Computing</b>                                                                                                                                                                                                                                                                                                                                                                                                                                               | <i>Ongoing</i> |
| <ul style="list-style-type: none"><li>Developing an offline-first mobile app that enables communication during disasters when internet or mobile networks are unavailable.</li><li>Uses peer-to-peer communication (Bluetooth and Wi-Fi Direct) via Google Nearby Connections, with a store-and-forward mechanism for message delivery.</li><li>Features offline messaging, SOS alerts and GPS location sharing.</li><li>Syncs data to Firebase Cloud and a rescue dashboard when connectivity returns.</li></ul> |                |
| <b>Tech Stack:</b> Flutter, Google Nearby Connections API, Firebase, GPS, Cloud                                                                                                                                                                                                                                                                                                                                                                                                                                   |                |

### INTERNSHIP

|                                                                                                                                                                                                                                                       |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>EFILLIKS – Full Stack Development Intern</b>                                                                                                                                                                                                       | 15 days |
| <ul style="list-style-type: none"><li>Gained practical exposure to front-end and back-end technologies while developing and enhancing web applications.</li><li>Collaborated with the team to build responsive and user-friendly solutions.</li></ul> |         |

### CERTIFICATIONS

- Full Stack Development** – NOVITECH
- Cybersecurity** – HCL GUVI
- Japanese Language Proficiency Test (N5)** – JLPT

### ACHIEVEMENTS

- Finalist, Moonlight Talkshow – V-Dart, Trichy; spoke on “Most valuable thing we cannot buy- Time”.
- Completed Japanese N5 certification and continuing Japanese language learning.
- Active participant in technical events and coding challenges.

### LANGUAGES & INTERESTS

**Languages:** Tamil , English , Japanese (N5 Certified)  
**Interests:** Cybersecurity, UI/UX Design, Full Stack Development
